The address is of great interest as embodying that statesman's opinion of the future relations between France and Prassia. He thinks that France has gained by the exclusion of Austria from Germany, and that Napoleon and his cabinet will maintain the most friendly relations with enlarged Prussia. The news of the failure of the French in the Corea is confirmed by telegram via Kiachtka, which reports the expedition a total failure, and that the natives were greatly clated and European prestige much damaged.

The Russian Vyest, a special organ of the noble classes, has an important article on the subjects of an Austrian agitation for Polish nationality as a means of embarrassing the policy of Russia in the East. The paper points out the helpless condition in which the Austrian empire was placed by the late war, and claims that the show of sympathy towards Poland is useless, as it is insincere. Russia's power to contract alliances in Europe is set forth, the writer also claiming that the United States, 'the political unit which has long kept aloof,' begins 'to exercise a considerable in fluence in the destinies' of the Old World, 'in concert and harmony' with Russia.

We have later dates from Prince Edward Island, confirming the statement that the Liberal or opposition party has won a decided victory in the Legislative Council elections. Of the six members just elected, only one is triendly to the Government. The organs of the Liberals are hugely tickled, and predict a similar triumph in the Assembly elections soon to be held. If these predictions are realized, there will be a change of government, but a change which can hardly be expected to bring about any change of policy in reference to Confederation. BANK OF BRITISH NORTH AMERICA. --A general meeting of proprietors was held Dec. 4th, at the London Tavern; Mr A. H. Phillpots in the chair. The following is the report of the directors: "In submitting the present report, the directors are able to congratulate the proprietors noon the satisfactory position which the bank occupies after the late most severe and protracted financial crisis. There is every prospect that the result of the operations of 1866, after due provision shall have been made for all doubtful contingencies, will compare not unfavorably with those of last year. In Canada West the crops have this year been abundant in quantity, and bave been secured generally in good condition. In Canada East they suffered considerably from a continuance of wet weather. But not withstanding this drawback the trade of these important provinces, as well as of Nova Scotts and New Brunswick, continues in a sound and satisfactory state. in the colonies of Vancouver Island and British Columbia, and several failures have an consequence occurred, by some of which this bank may be affected. But after making suitable provision for those contingencies, the business on the Pacific Coast continues profitable. Your directors have now to announce that they have declared the usual half-yearly dividend of 30s. per share, being will be payable, free of income tax, on and after the 5th of Jan. next. Two vacancies having occurred in the direction, by the retirement of Mr W. R. Chapman and the death of Sir W. Minto T. Farquhar, Bart. M. P., the same will be filled up at an extraordinary general meeting, to be held at the conclusion of the general meeting." The Chrirman, in moving its adoption, observed that the reports made by the directors at that season of the year were necessarily of a had not the whole of the year's accounts to deal with, all they could do was to convey to the shareholders the result, so far as the progress of the year would enable the board to deal with the figures themselves, and the judgment they formed therefrom of what would be the results of the general business at the conclusion of the year. On the present occasion the result, as stated in the report, would not compare unfavorably with that of last year, and he might perhaps go so far as to say that the directors saw no reason to fear that there would be any reduction next June in the division of profits as

compared with the corresponding periol of

1865, when it would be recollected they paid

a bonus of one per cent. in addition to the

normal 6 per cent. dividend, making in the

whole 7 per cent. for the year. (Hear, hear.)

A Shareholder-It is stated in the report

that you are likely to sustain losses in Cali-

fornia. Can you tell us to what extent? The

Chairman-Considerable depression has late-

ly prevailed in the colonies of Vancouver Is-

land and British Columbia, and several fail-

ures have in consequence occurred, by some

of which this bank may be affected. This

does not refer to California. It is impossible

to say what those possible losses may amount

to, but certainly nothing to alarm us-(hear

hear)-and we believe we have made ample

provisions for them. (Cheers) Mr Brookin-

a director, having seconded the motion, it

was carried unanimously. An extraordinary

meeting was then held to elect two directors in the room of Mr W. R. Chapman, retired,

cordial vote of thanks to the chairman and

directors concluded the business. THE POISONING CASE -- Dr Davie, on Saturday, visited the convict, Mrs Sampson, lieg to defraud the revenue; instead of com. and found her laboring under a degree of excitement bordering on insanity. The woman is pregnant. There are no accommodations for prisoners of her sex at the goal. Her every want has to be supplied by the keepers, and her forlorn state may well be imagine t by our lady readers. It is rumored that Dr Davie has recommended her removal to the Female Infirmary for treatment. A petition from the Grac I Jury to the Governor, another from the women of Victoria, and a third from the convict's husband, to the Governor, asking for her pardon, are on foot. Her extreme youth. (she is only fifteen) and the extraordinary circumstances under which a conviction was obtained will, we think, cause an application to His Excellency to result successfully.

Instead of there being a million of inhabitants, it appears that the city contains hardly three quarters of a million. THE GREAT STRIKES! (Frem the Islander.)

WILLIAMS CREEK, 3d Fab., 1867.

We are in the middle of excitements here again. All Conklin's Gulch has been fresh staked from the bottom almost to the top, on both sides. The United Company made very heavy pay before they were obliged to lay off. There are a great number of tunnels running. The United are running a fresh tunnel in order more easily to work their ground, as the present one is very inconvenient on account of the distance they have to run their dirt. The Home Stake have run one, but at too high a grade, and bave commenced to run a fresh one. They struck over the top of the channel, by a considerable height with the first. They are fully convinced they have the United channel. The Hood Company have tenders out for a fresh tunnel. The Home ticket is in considerable favor; got a good prospect on the rim. They are now putting a new shart down to strike the channel. There are several other companies in the gulch; some are paying, and some are only commencing.

On Canadian Creek there has been very great excitement, and it has been staked off almost from top to bottom, and you may look out very probably for something of importance shortly in that quarter, as three or four of the companies are nearly down.

Grouse is going on splendidly, and the boys from that quarter are spending their money excessively free.

Quartz is creating considerable excite. ment, and they are trying to get a site for the quartz mill for which a company has been got up, but met with considerable difficulty on account of the Bed Rock Flume Com-Considerable depression has lately prevailed | pany, which claims all the water in the creek above the canyon. There is considerable work going on on the creek, and everything looks like a prosperous season,

I suppose that you are in the midst of considerable excitement down telow as to the capital. I have signed the petition for Victoria, but am afraid, from the report of the Governor's speech, it will be of little avail. There are here a good many in favor at the rate of 6 per cent. per annum, which of New Westminster, but the majority scem to favor Victoria.

THE CLIO .- H. B. M. steamer Clio arrived on Saturday morning the 13th, from Victoria, V. I. She arrived off the port on Friday night, and fired two guns, and burned blue lights. It happened that it was the very time, when our citizens were expecting the Colorado, consequently many went to the Esplanade to watch the mail steamer while a boat with with some of our more entersomewhat meagre character, because, as they prising citizens went off to the steamer in search of news. But though disappointed in the mail steamer, the arrival of the Clio, was a pleasant event, bringing as she did, Capt. Turnour, and many of the officers, who were in the vessel when she came here to convey Queen Emma to Panama. In our editorial column it will be noticed that Capt. Turnour has received a decoration from His Majesty Kamehameha V. The stay of the vessel, though short, was enlivened by several parties, gotten up for the entertainment of the officers, by our English residents. There is on board an amateur theatrical troupe, called the "Funny Fellows." They gave a performance at the Hawaiian Theatre on Wednesday night, the 16th, for the benefit of the Queen Hospital. It was well attended, the amateurs succeeding admirably in pleasing the audience. The receipts were \$100 over expenses, which was passed over to Mr C. R. Bishop, the Treasurer of the Hospital. The Clio coaled and sailed on Thursday, the 17th ult., for Valparaiso. She will touch at Tabiti. We understand that Admiral Denman limited the stay of the Clio in this port to four days. When last here, a night frolic of one of her under officers, led to s me correspondence with the United States Government, which has resulted in the Admiral's

Scrofula, or King's Evil.

scrofula, or King's Evil.

Is Constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impare air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, cruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous constitutions not only suffer from scrofulous constitutions have far less power to withstand the attacks of other diseases: consequently, yast numbers perish by disorders which although not scrofu-

this taint in the system. Most of the consump-tion which decimates the human family has its

origin directly in this serofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, ariso

neys, brain, and, indeed, of all the organs, ariso from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing, and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from the blood, and the rescue of the system for the statement of the system of th

discovered for the expurgation of this fold discovered for the expurgation of this fold discovered for from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISCASES, ANTHONY'S FIRE, ROSE, OF ERYSIFELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER, and SALT RIMEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISCASES, DROPSY, DYSIFEISIA, DEMERTY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "impurity of the blood," is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

THE CITY OF GLASGOW

ESTABLISHED 1836;

FOR ALL THE PURPOSES OF A FAMILY PHYSIC, are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties sea, ch, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debity is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they care the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: Costiveness, Hearthura, Headache arising from a disordered Slomach, Nausca, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jamodice, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

FOR THE RAPID CURE OF Coughs, Colds, Influenza, Hoarseness, Croup, Brenchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the dis-

Ayer's Cherry Pectoral,

So wice is the field of its usefulness, and so manerous are the cases of its cures, that almost every section of country abounds in persons, publicly-known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its ority over every other medicine of its kind is too apparent to escape observation, and where its virtues are knewn, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the affilied they can never forget, and produced cures too numerous and too remarkable to be forgotten.
